

EMPOWER HACKS

The Problem

The Information Age is in full swing, and amidst all the growth and opportunity, millions of students around the world are being left behind and forgotten. Unable to access the level of education that is necessary in our modern world, many of these students don't have access to computer science education. An estimated **25% of students in USA report having no access to any computer science class or club at school.** The numbers only get worse in other countries around the world where education is still not accessible to all students. Irrespective of background, the ability to learn to code and develop programming as a skill is crucial for these students to succeed in our rapidly evolving world. **It is crucial that we foster aspiring students in computer science to improve lives on a global scale.**

The Solution

At Project: Empower, we are part of the solution. **Our vision is to solve problems in underprivileged communities through code.** As part of this, we are hosting a Hackathon in mid August to provide a unique opportunity

for students to **collaborate and work with like-minded individuals to bring their ideas to light**. The hackathon will start during the kick-off meeting, and the students will be given the prompts and resources they will need to work on their projects. The attendees will then be guided and mentored as they work through the process of developing a software application to achieve the goal of solving a problem they see in the world around them. While many attendees will start off the hackathon with little to no experience, they will learn and build upon each other's strengths to create working results that put them on the path to success. At the end of the working period, the panel of judges will choose the best projects for various different prizes ranging from most unique to most impactful. These prizes will then be distributed at the closing ceremony, which will include fun closing activities as well as speeches from the sponsors and organizers. This event is **set to be our biggest live event yet**, and you can help make it a fun and enjoyable learning experience for all attendees.

Your Support

By sponsoring this Empower Hacks, you will be providing crucial funding for the overall success of this event. Estimated to bring in **over 300 students globally**, we need your support to make this an enjoyable hackathon for all attendees. The most popular form of support is through financial sponsorships, and we offer multiple tiers with awesome perks. Through your sponsorship, attendees will receive better support, prizes, and opportunities post-hackathon. It provides a prime opportunity for you to **support the programmers of tomorrow and advertise your own organization at the same time.**

Perks

	Bronze \$250	Silver \$500	Gold \$1,000	Platinum \$3,000	Title \$6,000
Distribute Merch					
Logo on Media					
Branded Prize		1 Branded Prize	1 Branded Prize	1 Branded Prize	2 Branded Prizes
Opening/Ending Ceremony Speech			3 Minutes	5 Minutes	10 Minutes
Marketing Announcement(s)				1	2
Official Co-Host Branding
